

RYAN NYBERG

FULL-STACK JAVASCRIPT DEVELOPER | NEXT.JS · REACT · NODE.JS

Dresden, Germany | Remote Germany / EU | GitHub: github.com/onlyhouse1980 | LinkedIn: [linkedin.com/in/ryan-nyberg](https://www.linkedin.com/in/ryan-nyberg) | ryan@ryanernstnyberg.com | +49 157 56424428 | English: Native | German: C2

PROFESSIONAL SUMMARY

Product-focused Full-Stack JavaScript Developer specializing in modern web applications built with Next.js, React and Node.js. Hands-on experience building customer portals, SaaS workflows, subscription products, authentication, database-backed features, API integrations and responsive applications from concept through deployment. Comfortable owning complete features across frontend and backend concerns and using AI-assisted development to accelerate implementation, debugging and refactoring.

CORE TECHNICAL SKILLS

JavaScript (ES6+) · Next.js 13-16 / App Router · React · Node.js · MongoDB / MongoDB Atlas · Tailwind CSS · Auth.js / NextAuth.js · OAuth 2.0 · REST APIs · Vercel · Cloudinary · Upstash Redis · Lemon Squeezy · PDF.js / pdf-lib · Git / GitHub · Responsive Web / PWA

Current development focus: TypeScript and PostgreSQL/Supabase, specifically to extend existing Next.js/React full-stack experience.

PROFESSIONAL EXPERIENCE

Freelance Web Developer | Germany | 2026-Present

- Develop and maintain full-stack web applications using React and Next.js across UI, server-side logic, data persistence, authentication and third-party integrations.
- Translate business workflows into practical dashboards, administrative interfaces and customer-facing product features; deploy through Git-based workflows and Vercel.

Software Developer | Orchard Beach Community Group | 2016-Present

- Lead end-to-end development of a community portal and authenticated customer platform, including MongoDB-backed data workflows, member tools and administrative interfaces.
- Architected automated billing/usage functionality, administrative dashboards and a custom member-management CRM to improve operational efficiency and data organization.

JavaScript Developer | The Evil Burrito | 2019-2021

- Designed and deployed a responsive brand website and supported customer acquisition with digital/physical marketing assets and campaign execution.

Area Brand Manager | Pirate's Booty | 2008-2012

- Managed B2B retail relationships, regional merchandising and experiential promotions; recruited and led Brand Ambassadors while maintaining strong regional sales performance.

Brand Ambassador & Campaign Manager | Encore Nationwide | 2008-2012

- Managed regional promotional campaigns and event operations, including the high-profile 'Camp Vegas' activation, product demonstrations and consumer acquisition initiatives.

Brand Ambassador | Level 1 Promotion | 2008-2012

- Executed grassroots and experiential campaigns, product demonstrations and field-feedback collection for diverse client portfolios.

Event & Promotion Coordinator | House of Blues Entertainment | 2008-2012

- Coordinated live events, artist booking and promotion, targeted audience outreach, guest-list operations and on-site crews from load-in through event completion.

SELECTED ENGINEERING PROJECTS

Water Utility Customer & Administration Portal

Next.js | React | MongoDB Atlas | Node.js

- Built customer dashboards for meter consumption, account information and usage/overage calculations.
- Implemented dynamic customer routes and database-driven interfaces using Next.js.
- Created an administrative grid editor with changed-value-only persistence to avoid unnecessary writes.
- Worked directly with MongoDB Atlas using the native Node.js driver.

Contract Management Platform

Next.js 15 | React | MongoDB | Auth.js | Google OAuth | Upstash Redis | PDF.js

- Built authenticated contract, provider, evidence and document workflows using the Next.js App Router.
- Implemented Google OAuth authentication with Auth.js and integrated external Google services.
- Added PDF-processing functionality and Redis-backed application behavior with Upstash.
- Designed MongoDB-backed entities and application flows across frontend and server-side concerns.

Digital Membership Platform

Next.js 16 | React | JavaScript | Lemon Squeezy | Vercel

- Developed membership/payment flows, protected content delivery and digital asset preview functionality.
- Implemented preview watermarking and structured the application for Vercel deployment.
- Built with current Next.js App Router architecture and reusable React components.

Personal Assistant PWA

Next.js | React | JavaScript | PWA

- Developed an installable productivity application combining scheduling, calendar and expense workflows.
- Built responsive, reusable React interfaces for desktop and mobile use.
